

DO YOU HAVE DAMAGES?

Fire Hydrants

Street Signs

Curbs + Fences

Sewer + Water Lines

Buildings

Fire Trucks

Police Cars

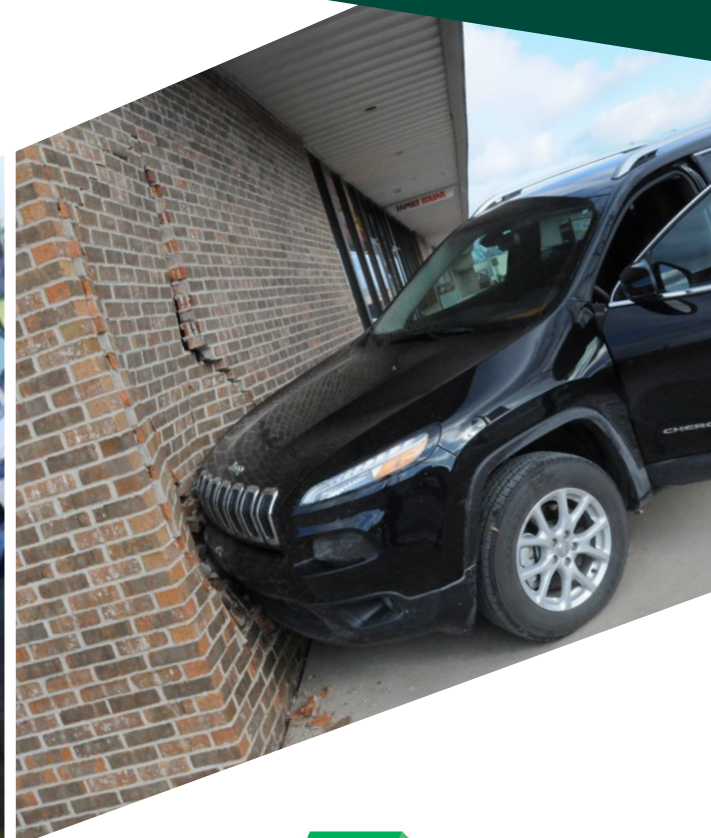

Inmate Damages

We pursue the third party responsible for the property damages and workers compensation to reclaim your losses.

Allow us to manage your subrogation claims and recover funds that might otherwise go unclaimed.

WHAT WE DO

We are a Third Party Administrator who responds to the needs of our clients through our role of effectively managing and assisting them in establishing systems and procedures to handle their Subrogation, Property Damage and Workers Compensation (caused by third parties).

We identify, investigate and manage property damage claims in a timely, accurate and efficient manner by pursuing the responsible third party and recover losses that otherwise might go unclaimed.

We understand that a cookie cutter fit to subrogation outsourcing is not suitable for everyone. We've created a refined approach that allows you to customize the subrogation outcome that's right for your business.

A NORTH TEXAS SUCCESS STORY

From 2012 - 2015, Gulf South Risk Services was contracted with the City of Fort Worth where we were responsible for:

- Reducing aging claims through quickly and efficiently recovering the funds
- Researching and recovering unclaimed funds
- Investigating and recovering new property damages
- Building relationships with City staff to encourage speed and accuracy of the claims process
- Assisting in establishing a subrogation claims process to better serve their existing staff after contract ended.

Gulf South Risk Services is currently seeking new organizations in the DFW area that are interested in benefiting from the property damage and subrogation services that we offer.

OUR STORY

Gulf South Risk Services has been providing our clients with exceptional claims management services since 1985, and we continue to be the leader in the industry throughout Texas, Louisiana, Alabama, Mississippi and Florida. Each member of our team has been hand selected for our high level of experience and expertise.
