

# Proactive Claims Management with a Personalized Approach.

With 24/7 availability and rapid response times, we aim for efficient and effective claims resolutions.

## Our Proactive, Personalized Approach to Claims Management

Our number one goal is to not only meet our clients' needs but also exceed them. We do this by offering personalized services tailored to each client's individual needs. Our skilled claims managers are available 24/7 and actively manage each claim to a swift resolution. Controlling the cost of your risk management program is at the heart of everything we do.

## Technologically Advanced

We use the most technologically advanced systems available. Our claims management system is cloud-based and accessible 24/7 for a work flow diary and real-time updates.

## Development of Prevention Program

Handling incidents as they arise is only one part of proactive claims management. In order to take control of your risk management, our team can help to assess data trends and identify weak areas in order to develop a prevention program that works.

## Dedicated Claims Manager

Each claim is assigned a dedicated claims manager, allowing you and your employees a single point of contact from start to finish. Our staff are highly trained in the most current state and federal regulations and are committed to an efficient and swift resolution of each claim.

## A cost-Savings return to work program

Having a consistent return-to-work program in place at your company helps to promote fast claims resolution and contributes to an overall reduction in claims. The experts at Gulf South Risk Services can customize a return-to-work program to suit your employees and your business needs.

## Development of Safety and Wellness Program

The overall safety and health of your staff is key to maximize productivity and increase morale. Having a proper safety and wellness program in place promotes healthy habits and minimizes incidents.

## Fast Turnaround Time

Calls are answered by a live operator 24/7. Immediate response and performing the initial investigation of an incident within the first 24 hours is critical toward swift claims resolution.
